CATALOGUE | 2024

WORKING AT HEIGHT

Scan's working at height range has been designed for maximum safety when working at height, without compromising freedom of movement and comfort. All applicable products have been independently tested to the relevant standards. The products are marked with the required standards and come with a full user information guide for correct use.

Our full range of safety products can be found on our website www.scan-safety.com

EN 358: 2018

The EN 358 standard specifies the requirements, tests, marking and information supplied by the manufacturer regarding belts and lanyards intended for the purpose of work positioning or restraint of operators when working at a height.

EN 361: 2002

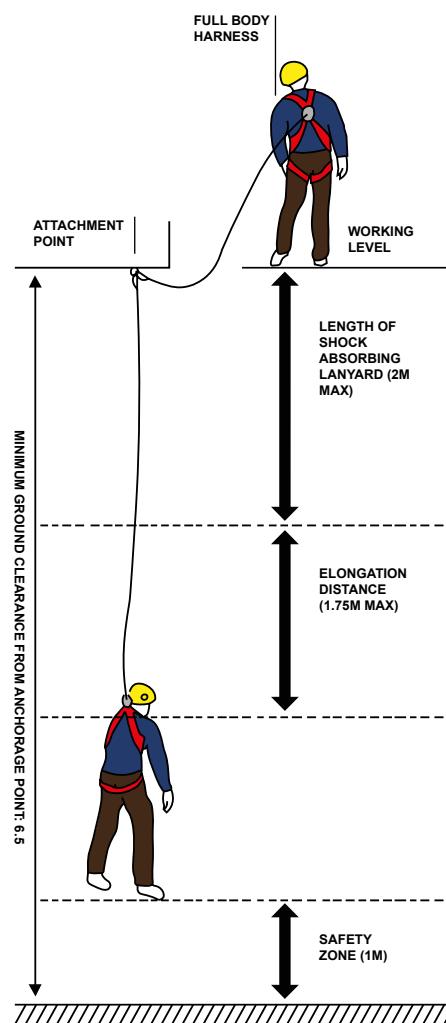

The EN 361 standard specifies the requirements, test methods, instructions for use, marking and packaging for full body harnesses.

EN 362:2004

The EN 362 standard specifies the safety requirements and test methods for connectors used for working activities with the risk of fall from a height. By connectors we mean harnesses, anchoring devices, ropes, snap hooks specifically used for work, therefore by workers who must access places (walls, scaffolds, various machinery) featuring a falling hazard.

EAR DEFENDERS

HELMET MOUNTED

The Scan Helmet Mounted Ear Defenders clip into most standard helmet slots. With a noise cancelling ratio of 30db, they are effective in reducing noise levels, whilst still allowing the wearer to hear normal conversation. The soft and wide PVC ear cushions enhance comfort, and the swivelling cup design allows for easy manoeuvring. The fluorescent yellow colour enhances visibility.

This ear defender has a Single Number Rating (SNR) of 30, meaning it will reduce noise by 30 decibels (db).

- HI-VIS YELLOW FOR ENHANCED VISIBILITY
- SWIVELLING CUP DESIGN FOR EASY MANOEUVRING
- CLIPS IN TO MOST STANDARD HELMET SLOTS
